T-Shirt

Sample - Purchased version includes PNG files.

To make a custom Ecli T-Shirt, use a site like uberprints.com, which does not require a minimum order quantity. For other custom shirt sites, search the web for “custom T-shirt”.

On the website of your choice, select the T-shirt color you’d like. Then, decide if you want a monochrome or color Ecli logo. If you have chosen a dark color shirt, upload one of the “for Dark Shirt” PNG files. If you have chosen a light color shirt, upload one of the “for Light Shirt” PNG files.

The PNG file should be placed and sized on the shirt as follows:

Image height: 6.0 inches [152.4mm]

Image width: 3.0 inches [76.2mm]

Image placement: centered on the shirt, about 3 inches [76.2mm] down from the collar.

You can also use the Ecli T-Shirt PNG files to print on a sweatshirt, hoodie, or anything else you can think of!
